

- "QUESTION - RÉPONSE - ÉCHANGE"

Notre collègue David Alberto nous fait suivre le mail de la Tesseract

« Je viens de recevoir le lien vers le dernier catalogue (117) de la maison "Tesseract" (États-Unis) qui vend des instruments scientifiques anciens, notamment des cadrans solaires. De quoi rêver à se constituer une magnifique collection pour son salon... après passage à la banque, bien sûr ! »

PS : Professionnels ou non, si vous avez des objets gnomoniques à présenter n'hésitez pas à nous le faire savoir, nous les diffuserons en interne de la CCS, ce pour le plaisir des yeux ... ou pour achats (en toute indépendance publicitaire).

Hello,

A 200-year-old pendulum clock with the Muse of Astronomy surrounded by all manner of scientific instruments, Henry Sutton's form of quadrant / sundial in brass, a Venetian inclinometer by Bernardo Facini dated 1700, a fine early quill cutter, Roman dividers, a signed spinthariscopes, a Curta calculator, Perigal's kinescope by Elliot, and Hawksley's self-illuminating ophthalmoscope.

These are a few of the dozens of antique instruments presented in our new Tesseract Winter catalogue, issue 117.

Also included are a remarkable pair of slide rules for producing the finest Scottish ale, an early Musschenbroek-form pyrometer for metal expansion studies, a collection of cameras lucida for the microscope, one of three recorded Mariners' Journalets, a c. 1560 star-shaped sundial, a brass compass-maker's plate from 1680, a major 17th century surveying instrument, an innovative iron pelican, Tarnier's articulated bronze female pelvis and sacrum, and a rare example of Goldmann's stylometric rod for architecture of columns.

Prices range from \$75 to \$23,000, and everything is fully illustrated, described, and priced.

The printed catalogue can be ordered from us (\$10, or \$35 for subscription of four issues), or it can be downloaded for free at <https://www.etesseract.com/C117.pdf>

Dozens of other items are listed on our website <https://www.etesseract.com/>

And our book list, offering many new reference materials as well as antiquarian items, is available at <https://www.etesseract.com/Books.pdf>

Also in our stock we have a remarkable survival, a 1518 Renaissance quadrant by Oronce Fine, only the third surviving instrument by this extraordinary polymath. David has described it in an article, which can be downloaded at <https://www.etesseract.com/BSS1518.pdf>

Thank you for your interest.
